SUMMARY

Computer Science undergraduate specializing in Machine Learning, full-stack development, and UI/UX design. Proficient in Python, Java, JavaScript, and React, with hands-on experience building data-driven applications, RESTful APIs, and full Figma app designs. Seeking a Software Engineering, Machine Learning, or UI/UX Design Internship to apply a strong technical foundation across development and design.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, Dart, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Spring Boot, Flutter, JAX-RS, Scikit-learn

Databases & Caching: MySQL, PostgreSQL, MongoDB, PostGIS, Redis

Design & UI/UX Tools: Figma, Visual/UI Design

Tools & Platforms: Git, Postman, Vercel, Maven, Jackson (JSON), Stripe API

EDUCATION

BSc (Hons) Computer Science

University of Westminster

Sep 2024 - Present

Foundation Certificate of Information Technology

Informatics Institute of Technology

Jan 2024 - May 2024

G.C.E. Advanced Level (Physical Science Stream)

Viharamahadevi Balika Vidyalaya, Kiribathgoda

2022

TECHNICAL PROJECTS

resQcar - Location-Based Mobile Application | Software Development Group Project

- Built a location-based mobile app connecting stranded vehicle owners with nearby mechanics for real-time roadside assistance.
- Developed secure backend services using Node.js, Spring Boot REST APIs, and JWT authentication, with Redis and WebSocket for low-latency communication.
- Implemented spatial database features with PostgreSQL and PostGIS for live location tracking and proximity search.
- Built the mobile UI with Flutter (Dart) and integrated Stripe for in-app payments.

Technologies: Flutter (Dart), Node.js, Spring Boot, JWT Authentication, Firebase, Redis, WebSocket, PostgreSQL, PostGIS | **Tools:** Postman, Stripe, Git

Estate365 - Real Estate Website UI Design | UI/UX Design, Figma

- Designed a modern, responsive real estate website interface in Figma.
- Created a clean visual system including a navbar, hero section, property search cards with filters, feature highlights, and footer.
- Delivered polished, on-brand visuals ready for front-end implementation.

Technologies: Figma | **Focus:** Visual/UI Design

ConfTracker - Conference Deadline Tracker App Design | UI/UX Design, Figma

- Designed the complete multi-screen UI for ConfTracker, an app to help researchers track conference submission deadlines, including sign-in/authentication, dashboard, and deadline-tracking screens.
- Built a cohesive visual system with a consistent color palette, iconography, and form styling across all screens.
- Established a clean, friendly interface aligned with the app's branding and user experience goals.

Technologies: Figma | **Focus:** Visual/UI Design

AI-Driven Study Planner

- Built a full-stack MERN application integrated with a Scikit-learn model to predict exam success probability from study metrics.
- Connected a Python ML service to a Node.js backend to deliver real-time predictions to a React.js dashboard.

Technologies: React.js, Node.js, Express.js, Python, Scikit-learn, MongoDB | Tools: Postman, Git

Smart Campus Sensor & Room Management API

- Built a RESTful API with JAX-RS, Jersey, and Grizzly Server to manage campus-wide room and sensor data.
- Designed a thread-safe in-memory data store to achieve low-latency responses without a traditional database.

Technologies: Java, JAX-RS (Jakarta REST), Jersey, Grizzly Server, Jackson (JSON), Maven | Tools: Postman, Git, cURL

Nestora - Real Estate Web App

- Built a responsive real estate web app with React.js and Vite, deployed continuously via Vercel.

Technologies: React.js, Vite, CSS3, JavaScript | Tools: Git, Vercel

Inventory Management API

- Built CRUD REST APIs with Node.js and Express.js for customer registration, inventory, and order management on MySQL.

Technologies: Node.js, Express.js, JavaScript, SQL | Database: MySQL | Tools: Postman, Git

Personal Finance Tracker

- Built a Spring Boot and Thymeleaf web app to track income and categorized expense transactions, backed by MySQL.

Technologies: Spring Boot, Thymeleaf, Java | Database: MySQL | Tools: Postman, Git

Traffic Flow Analysis System

- Built a Python application to clean, validate, and visualize traffic flow data from CSV files to identify optimization trends.

Technologies: Python (data analysis & visualization libraries) | Tools: Git

COURSES & CERTIFICATIONS

- Java Programming (Professional Development Unit) - IIT
- Python Programming - University of Moratuwa
- Web Design for Beginners - University of Moratuwa
- Front-End Web Development - University of Moratuwa
- Server-Side Web Programming - University of Moratuwa
- AI/ML Engineer Stage 1 & 2 - SLIIT
- AI/ML - SoloLearn
- Java Certification - HackerRank
- Python Certification - HackerRank

COMPETITIONS & LEADERSHIP

- Advanced Tier, Code Rally 6.0 - IEEE Computer Society Student Branch of IIT, Team Bit Forge (2025)
- Vertex'25 Robotics Workshop - IEEE RAS Student Branch of IIT (2025)
